

Network License Setup

CAD Viewer / CAD Markup / QA-CAD / QA-CAD LT 2022

Overview

The CAD Viewer / CAD Markup / QA-CAD / QA-CAD LT 2022 Network Licenses allow the software to be installed on any number of computers in a local area network, with the maximum number of concurrent users as specified in the purchased license.

Setup Steps

(1) Decide on a 'share' folder that will be accessible to all users. The folder must exist and be read/writable for all users. Typically the folder will be on a server, but may be on any computer that is accessible to all clients. The share folder is where license information is stored.

(2) Install the software on a client computer by running the setup file.

(3) Start the installed software by clicking on its desktop icon, or by locating it in the Windows Start menu. Enter the location of the share folder (as decided in step 1.)

The screenshot shows a dialog box titled "CAD Markup 2022 Network". It has a close button (X) in the top right corner. The main text says "Enter the location of the network license 'share' folder ...". Below this is a text input field containing "\\servername\share" and a button with three dots "...". Below the input field is a section titled "Important" with the following text: "The network license 'share' folder will usually be located on your server, and needs to be entered exactly the same on each client computer. All clients must also have read/write access to this single shared folder." Below this text is an "Example:" label followed by "\\servername\share". At the bottom are "OK" and "Cancel" buttons.

Important

Note that the share folder location needs to be entered exactly the same on all client computers. For example the 2 pathnames below

\\servername\share
\\servername.domain.com\share

may point to the same share folder, but would each generate different identifier values. It is a requirement that the same exact path be used on all client computers, for example \\servername\share.

(4) After the share folder is selected, the software will prompt for the license details. This step requires the computer to have Internet access. Enter the "License ID" and "Password" provided at purchase.

The screenshot shows a dialog box titled "CAD Markup 2022 Network - Activate online". It has a close button (X) in the top right corner. The main text says: "Enter the License ID and Password issued to you to activate. An internet connection is required. If you encounter an error, please double-check that the License ID and Password are correct, and temporarily disable any firewalls." Below this text are two input fields: "License ID:" with the value "12345678" and "Password:" with the value "*****". Below these fields is a label "Share folder pathname:" followed by a text input field containing "\\p7\c\share" and a button with "<--". At the bottom are "Activate" and "Cancel" buttons.

Upon successful activation a license file will be generated and stored in the share folder.

(5) Install the software on any other clients that need to use the software by repeating steps (2) and (3) only.

Common Activation Issue

The 'Activate Online' dialog as at step 4 should be a one time only occurrence. Upon a successful activation the generated license file is stored to the share folder. If the 'Activate Online' dialog appears on subsequent installations, it indicates that the software did not find the stored license file. The most likely cause is that a different share path was entered. Go back and reenter the correct share path. Make sure to enter this exact same path for all clients.
